Filters

CC File Hidden does have a utility known as the filter tool, which will filter the perspective of the CC File Browser (for an example make the CC File Browser only show the files which are of .mp4 file format). Filter Presets that came default are stated below,

Filter Preset	Included file formats
Video and Audio	.avi;.mp4;.flv;.mkv;.webm;.mpeg;.mov;.3gp;.mp3;.acc;.amr;.midi;.m4a
Images	.jpeg;.jpg;.png;.gif;.bmp
Text Documents	.txt
Microsoft Office Word Documents	.docx;.doc
Microsoft Office PowerPoint	.pptx;.ppsx;.pptm
PDFs	.pdf
All Files	All file formats (*.*)

Custom Filter

By clicking on the Custom Filter button in the bottom of the Filter Presets list, you will have a new dialog that is capable of creating Custom Filters. To create a custom filter, just enter the file formats that you need to show by separating them with a semi-colon (';'). **Ex: .mp4;.mp3**

NOTE: CUSTOM FILTER SHOULD NOT CONTAIN ANY SPACES.

NOTE: CUSTOM FILTER MUST NOT BE EMPTY.
